

# **Urgent Appeal to all Members about Posting on Social Media**

All members please pay your kind Attention:

We are passing through very crucial phase, facing all around negativity and facing Management's onslaught. We have to save whatever the benefits we have got till now.

We are seeing a tendency among Members to post whatever they get on Social Media without thinking pros and cons. By this way we are exposing our precious tools and weapons. We do it as if we are doing a great service, but in fact we have been helping negative people. It spreads confusion and panic. An order issued from a far corner is being posted by the people of another corner of the country.

Few days back there was a fixation of one SEA in AIR Hyderabad who is retiring. Within minutes all started circulating it without understanding that how damaging Role it can play.

Please realize that in social media groups there are people from different sectipns, who are friendly or unfriendly to engineering employees. We are cutting our own hands and encouraging negative people to expedite the implementation of a harmful order and to devise a strategy to counter us. This over enthusiasm on social media is playing a damaging role. In fact we are helping Management indirectly and we in Central Office have to spent more energy to handle the queries.

Please realize that we in ARTEE Central Office is more concerned than anybody else and keeping a watch on everything.

We Appeal all not to post such things on social media. If you have anything which can help in the cause, we request you to send it in Mail or to send it personally.

Kindly follow this judiciously and help us in handling the situation.

**Central Office**
