

Appeal to ARTEE Units- #Saveakashvani

In the background of the possibility of decommissioning / closure of more SW and MW transmitters without installing alternate DRM transmitters, we should now make efforts to make a nationwide campaign to Save Akashvani. Because without the installing new transmitters, the service of All India Radio will be denied to common man in many parts our country in the coming days.

Without installing new digital transmitters, the existing transmitters (SW,AM or FM) will be decommissioned or close down after their normal life span in the coming years. And it is also a fact that procuring suitable spare parts for our existing old generation transmitters also will be major challenge for the continuation of the service of our existing transmitters.

Hence we should demand the government and Prasar Bharati to speed up the process for digitization of All India Radio.ARTEE Central Office request all our local units to make efforts for the replacement of the existing transmitters which already served it's life span or about to complete its normal life span in the coming years.

As the first step, local ARTEE units may contact the Member of Parliament from their areas and request them to write a letter to Honorable Minister of Information & Broadcasting and CEO Prasar Bharati demanding urgent action for strengthening the existing MW transmission by modernizing the medium wave and short wave radio transmitters with DRM Technology.

#Saveakashvani

Central Office, ARTEE
